INTRODUCTION

The 2010 *South Carolina Academic Standards for the Visual and Performing Arts* is presented as a series of seven documents that individually address the arts areas of dance, choral music, general music, instrumental music, media arts, theatre, and visual arts from kindergarten through high school. Delineating what the state's children should know and be able to do in these content areas, the seven documents are intended to be used not only as the basis for curricula, instruction, and assessment in the arts disciplines in South Carolina schools but also as a concise statement about expectations for learning in the arts for policy makers, education administrators, teachers, and instructional and community leaders.

South Carolina Department of Education professional staff, in collaboration with members of the South Carolina Visual and Performing Arts Standards Development Team, created this series of arts-standards documents. The fundamental process began with the development of the *South Carolina Visual and Performing Arts Framework* in 1993. The next year, *National Standards for Arts Education: What Every Young American Should Know and Be Able to Do in the Arts*, developed by the Consortium of National Arts Education Associations, was made available nationwide, and in 2003, the SCDE published its *South Carolina Visual and Performing Arts Curriculum Standards*, which utilized the nine content standards

Carolina Academic Standards for the Visual and Performing Arts will serve as the basis for the continuation of the comprehensive sequential arts education system offered in our state. In addition, these standards provide guaranteed experiences for our students to study, perform, and produce in the arts.

Ten years of ongoing research in South Carolina schools has demonstrated that increased and enhanced arts education programs make a significant impact on the state's students, schools, and teachers as well as its overall economic stability. For example, research conducted by the University of South Carolina's Office of Program Evaluation found quality comprehensive arts programs greatly changed the ecology of the schools. Such schools were found to have higher student attendance, higher parent approval, fewer discipline referrals, fewer student interruptions and more time on task, higher teacher attendance, and higher teacher morale. In addition, in 2002, the South Carolina Arts Commission reported that, according to a study conducted by the Division of Research in University of South Carolina's Moore School of Business, the cultural industry in the state was making a significant impact on the state's economy. That study, which updated in 2007, affirmed the state's cultural industry overall had generated \$2.4 billion dollars or more in output for the South Carolina economy, including \$766,249,688 in salaries and wages from 31,490 jobs—a significant return on the state's investment in the visual and performing arts.

Academic standards are statements of the most important and consensually determined expectations for student learning in a particular discipline. The 2010 South Carolina Academic Standards for the Visual and Performing Arts are provided for nine grade levels (kindergarten through grade eight) and four high school levels.

Indicators are specific statements of the content knowledge, skills, and performance levels that students must demonstrate in order to meet the particular standard. The term *including* in the indicator statements names the specific items that are intended to be the focus of the teaching and learning on the particular skill or concept. Teachers must focus their instruction on the entire indicator, but they must also be certain to include in their instruction the components specified in the *including* statements. The items named in the parenthetical *for example* statements, on the other hand, are suggestions rather than requirements.

Throughout the text of the standards and the indicators for the individual grade levels, terms that are defined in the glossary appear in boldface type. Words in the glossary are defined contextually as they are used in the standards.

The indicators are labeled in such a way that identifies the particular arts area. The following designations are used:

D = Dance

MA = Media Arts

MG = General Music (Music, General)

MC = Choral Music (Music, Choral)

MI = Instrumental Music (Music, Instrumental)

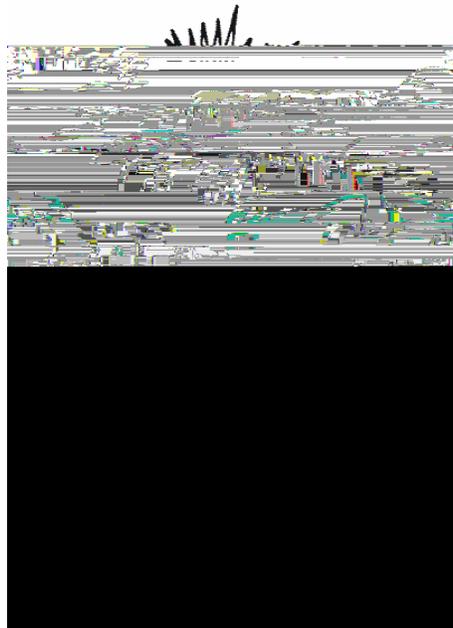

T = Theatre

VA = Visual Arts

The individual indicators are labeled alphanumerically by arts area, grade level, standard number, and sequential number. The example, the second indicator for standard 1 for Dance in the eighth-grade

Introduction

Education systems in the United States have long recognized the need for national standards to provide the basis for a common curriculum and academic programs throughout the country. In accordance with that objective, the 2010 South Carolina academic standards for Visual Arts are based upon the six content standards that are put forth in *National Standards for Arts Education: What Every Young American Should Know and Be Able to Do in the Arts*, a document developed by the Consortium of National Arts Education Associations and published in 1994, as were the Visual Arts standards in the *South Carolina Visual and Performing Arts Curriculum Standards*, published in 2003.

Studies in visual arts are components of a comprehensive visual arts program and are part of the overall school curriculum; therefore, a school's visual arts curriculum should include sequential visual arts courses as well as specialized courses in high school: Art 1-4, for example, and courses in drawing, painting, printmaking, sculpture, ceramics, graphic design, photography, and the media arts.

The revised South Carolina academic standards for Visual Arts are organized in six academic standards. Several of the academic standards are repeated across the grade levels. Teachers should understand that these standards need to be reinforced throughout these grades as the students use more advanced tools and media as well as more complex terminology and study art concepts in depth.

The Grade Levels

Visual Arts standards are provided for each grade level from kindergarten through high school. However, students enter the visual arts class with varying degrees of visual arts instruction. Visual arts teachers—who are held accountable for students' attainment of the visual arts standards—must therefore understand how the standards and indicators provide for sequential learning. In many instances, the performance indicator statements themselves suggest prerequisite skills that will help a teacher accommodate gaps in instruction.

Although the South Carolina academic standards for Visual Arts are numbered 1 through 6, the arrangement of these standards is not meant to suggest a sequence or hierarchy. Rather, the concepts contained within the various standards often overlap or are related to one another. Richly designed curriculum and instruction should integrate many standards within a unit of study, thus enabling students to see the connections among the six standards of the visual arts discipline.

Schools interested in developing quality visual arts programs should consult Winthrop University's "Opportunity-to-Learn: Standards for Arts Education," Arts in Basic Curriculum Project, online at <http://www2.winthrop.edu/abc/learn.htm>. In addition, program development recommendations can also be gleaned from the

South Carolina Department of Education document *Essential Elements of a Quality Visual and Performing Arts Program*, available online at <http://www.ed.sc.gov/arts>.

Grades K-8: South Carolina specifies academic standards and performance indicators for elementary (kindergarten through grade 5) and middle school (grades 6 through 8). Middle school visual arts classes should be scheduled to allow adequate instructional time for teachers to address all the 6 through 8 Visual Arts standards and indicators. In the case of limited-contact-hour classes (nine-week exploratory courses or one-semester courses, for example), teachers may not be able to address all of the standards, however. These teachers should therefore identify the indicators that repeat across the three grade levels and implement those particular ones in that class. Then later, as these students progress through the middle school grades, the teacher should seek to give students the optimum level of visual arts instruction by addressing the indicators that do show increasing complexity from one grade level to another.

Grades 9-12 (High School Levels 1-4): The Visual Arts high school academic standards and indicators are designed to reflect the highest possible levels of achievement in visual arts instruction. High schools that aspire to build a comprehensive visual arts program for their students should also consider offerings in the area of visual arts appreciation, visual arts history, and visual arts theory as well as in a variety of production-based visual arts courses. While high school visual arts programs make it possible for students who have participated in elementary and middle school visual arts programs to continue their growth as visual artists, high school students with no prior visual arts experience should be provided opportunities in the area of visual arts appreciation and in appropriate production-based courses
