

A family guide to MAP Growth

Children learn better—and faster—when teachers have a clear picture of what each student knows and is ready to learn next. That's why a group of educators and researchers founded NWEA®, a not-for-profit organization that has created some of the most trusted and reliable assessment solutions available. More than 11 million students in the US and in 140 countries worldwide use MAP® Growth™.

How it works

MAP Growth is a computer-adaptive test. If your child answers a question correctly, the next question is more challenging. If they answer incorrectly, the next one is easier. This type of assessment challenges top performers without overwhelming students whose skills are below grade level.

Your child's RIT score

RIT scores have the same meaning across grade levels. If a fourth-grade student and an eighth-grade student have the same RIT score in reading, then they are testing at the same level in that subject. This stable scale allows teachers to accurately measure each student's academic growth throughout the school year and over time.

You can use your child's RIT score to help them meet their goals. For example, students can enter their RIT scores into our college explorer tool to see which colleges and universities they're on track to enter. You can also check out online resources that use RIT scores to provide students with book recommendations and web-based exercises, such as YourReadingPath.com and KhanAcademy.org.
